

GUIDELINES FOR KCGS TOMBSTONE PHOTOGRAPHY PROJECT

Cemetery Rules

- Don't lift or move broken headstones
- Is it okay to use their bathroom, if necessary.
- Be quiet and respectful if you are in their office. We are in their work area and they have work to do. They have families in mourning coming in and out of their offices needing assistance. We don't want to interfere.
- Don't park in their customer parking area.
- Be respectful of a funeral in progress. Stand straight and put your hand over your heart while the procession is traveling by you. The mourning families truly appreciate that gesture.
- If someone is visiting the gravestone you are about to photograph, tell them what you are doing. Offer to come back once they leave. Some have told us to go ahead while they are there. If they object, you can skip over that one and do it once they are gone.
